PROFESSIONAL SUMMARY

Analytical and detail-driven Data Analyst skilled in SQL, Python, Power BI, and Excel with hands-on projects across retail, transportation, agriculture, and supply chain. Experienced in building end-to-end analytics solutions — from ETL and data validation to dashboard development and KPI reporting. Delivered insights on booking demand, customer behavior, crop yield forecasting, and inventory optimization, enabling data-driven decisions and operational improvements. Currently transitioning from Mechanical Engineering to Data Analytics, with a strong interest in applying AI/ML concepts to solve business problems.

EXPERIENCE

- **Force Motors Ltd.** Pune, Maharashtra
Graduate Engineer Trainee (GET), Operations Department Sept 2025 - Aug 2026
 - **Data Validation:** Processed and validated daily production and inventory records in SAP, cross-checking entries against physical stock and source documents to ensure zero discrepancies.
 - **SAP Entries:** Maintained structured SAP data entries for material movement, production output, and vendor transactions, ensuring records were updated within 24 hours.
 - **MIS Reporting:** Prepared MIS reports summarizing production KPIs and operational data, presenting findings to cross-functional teams.
 - **Process Improvement:** Identified mismatches between physical inventory counts and SAP entries, investigated root causes, and standardized entry processes to reduce recurring errors.

PROJECTS

- **Ola Booking Data Analysis** GitHub
Python, PostgreSQL, Power BI
 - **ETL & EDA:** Performed ETL and EDA on 100,000+ ride booking records using Python and PostgreSQL, surfacing booking patterns and cancellation drivers.
 - **Dashboard:** Built a 5-page Power BI dashboard with dynamic slicers, revealing a 62.09% ride success rate and Auto as the top revenue vehicle type.
 - **Recommendations:** Suggested GPS tracking and peak-hour deployment strategies to improve revenue and reduce churn.
- **Customer Shopping Behavior Analysis** GitHub
Python, PostgreSQL, Power BI
 - **Analysis:** Cleaned and analyzed 3,900 transactions across 18 features using Python and SQL queries.
 - **Insights:** Identified an \$82,699 revenue gap between male and female segments and top discount-dependent products.
 - **Dashboard:** Built a Power BI dashboard tracking purchase averages, ratings, and customer segments to inform loyalty programs.
- **Supply Chain Analytics & Inventory Optimization** GitHub
SQL Server, MySQL, Power BI, DAX
 - **Data Preparation:** Cleaned and joined inventory/product data in SQL Server, remapping unmatched product IDs for accuracy.
 - **DAX Measures:** Authored DAX measures for KPIs including demand, shortages, surplus stock, and per-day averages.
 - **Dashboard:** Built a 2-page Power BI report showing average daily availability at 50% of demand.
 - **Migration:** Migrated report from SQL Server to MySQL, rewriting queries and fixing column mismatches.
- **Agriculture Analytics & Climate Forecasting** GitHub
AWS S3, Snowflake, SQL, Power BI
 - **Data Loading:** Loaded agriculture datasets from AWS S3 into Snowflake using storage integration and COPY INTO.
 - **Data Preparation:** Added Year_Group and Rainfall_Groups columns while preserving raw data integrity.
 - **Dashboard:** Built a 4-page Power BI report comparing rainfall, temperature, humidity, and yield by year, season, and crop.
 - **Insights:** Found Rabi season had the highest average yield (24.9K vs 20.2K for Kharif) and rainfall alone did not explain yield variations.

TECHNICAL SKILLS

- **Languages & Databases:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (PostgreSQL, MySQL, SQL Server, Snowflake)
- **Tools & Platforms:** Power BI (Power Query, DAX), MS Excel (Pivot Tables, XLOOKUP), SAP ERP, SAP Analytics Cloud, Tableau, AWS S3, Git, Jupyter Notebook, Google Colab, GitHub
- **Data Expertise:** ETL, EDA, Data Wrangling, KPI Reporting, Dashboard Development, Statistical Modeling, Hypothesis Testing

TRAINING

- **Data Science and Python Training** — Bharat Soft Solutions
 - Covered programming concepts, data analysis, and machine learning techniques using Python.
 - Focused on deriving insights from complex datasets and applying analytics to business problems.

CERTIFICATIONS

- Data Analytics Certification — Udemy
- Data Science and Python Training Certification — Bharat Soft Solutions
- SAP Analytics Cloud Certification — Udemy

EDUCATION

- **Dr. D. Y. Patil Institute of Engineering, Management and Research** Pune, Maharashtra
Bachelor of Engineering in Mechanical Engineering; CGPA: 7.56 2022 – 2025
- **Government Polytechnic Jalgaon** Jalgaon, Maharashtra
Diploma in Mechanical Engineering; Percentage: 84.10 2019 – 2022
- **New English Medium School** Erandol, Maharashtra
SSC (Class X); Percentage: 86.60 2019
